Client

Westpac Bank (Fiji Branch) – Design and Installation of IP CCTV

Client Requirements

- Develop and implement a comprehensive CCTV infrastructure tailored to Westpac branches across Fiji, ensuring seamless coverage and security measures. This initiative involves meticulous planning, strategic placement of cameras, and the integration of advanced surveillance technologies. By designing and installing this CCTV system, Westpac aims to enhance security protocols, safeguard assets, and provide a safe environment for customers and staff across its wide network of branches throughout Fiji.

Integrated Solution

- The integrated solution for Westpac branches across Fiji encompasses the design, installation, and management of a state-of-the-art CCTV system. This solution integrates advanced surveillance technologies, including high-resolution cameras, motion detection, and remote monitoring capabilities. ECS strategically placed cameras at entrances, teller stations, and ATMs to provide comprehensive coverage and real-time monitoring of branch activities. Additionally, centralized management software allows for efficient administration and monitoring of multiple branches from a single location.

Business Value Delivered

- The integrated CCTV solution implemented for Westpac branches in Fiji delivers significant business value across multiple fronts. Firstly, it enhances overall security and safety for customers, employees, and assets within each branch. This fosters a sense of trust and confidence among customers, leading to increased foot traffic and improved customer satisfaction.
